## ATC, ITC, Dairyland Power announce May public open houses for Cardinal-Hickory Creek Transmission Line Project

*New transmission line will provide reliability, economic and public policy benefits*

MADISON, WIS. — American Transmission Co., ITC Midwest LLC and Dairyland Power Cooperative will host open houses next month to update the public on plans for a new electric transmission line that would connect Dane County, Wisconsin, and Dubuque County, Iowa.

The Cardinal-Hickory Creek Project would connect ATC's Cardinal Substation in the Town of Middleton, Wisconsin, with ITC's Hickory Creek Substation in Dubuque County, Iowa. The Midcontinent Independent System Operator, Inc., the regional electric transmission organization, approved the need for the approximately 125-mile, 345,000-volt project as part of a portfolio of 17 transmission line projects that were identified as Multi-Value Projects. These projects are expected to deliver multiple benefits to electric consumers across the Midwest by improving electric system reliability, providing economic benefits to utilities and electric consumers, and expanding electric infrastructure to support public policy for greater use of renewable energy.

"Investing in a robust transmission system is necessary for regional reliability and to support lower and stable energy prices by reducing congestion," said Ben Porath, Dairyland vice president, power delivery. "Cardinal-Hickory Creek will also support renewable energy policy. As Dairyland continues to diversify its generation portfolio with more renewable resources, the ability to access and transport renewable energy in the region will only grow in importance."

Next month's open houses follow those held in October 2014 to introduce the project in Wisconsin. Since that time, the companies have worked to identify preliminary corridors for routing the line. The companies will share those corridors at next month's open houses.

"Landowners and local officials have an important role to play in this process," said Angela Jordan, ITC area manager for local government and community affairs. "These open houses are part of our ongoing process of communication and dialogue with local landowners, citizens and other stakeholders about this important project."

Dates and locations for the open houses are listed below. Open houses are scheduled from 4 to 7 p.m. at each location. Attendees are encouraged to come at any time to speak with subject matter experts and learn more about the project; there will be no formal presentation.

### Monday, May 16 -

Peosta Community Center

7896 Burds Road

Peosta, IA 52068

**Tuesday, May 17 -**

Pioneer Lanes  
1185 US (Business) 151  
Platteville, WI 53818

**Wednesday, May 18 -**

Deer Valley Lodge  
401 West Industrial Drive  
Barneveld, WI 53507

**Thursday, May 19 -**

Deer Valley Lodge  
401 West Industrial Drive  
Barneveld, WI 53507

“We understand people have questions about the project and our plans, and these open houses will be a good way for the public to get updates and offer their perspectives,” said Jon Callaway, ATC senior local relations representative. “We look forward to meeting with the public and talking about their involvement in the routing and regulatory processes.”

The project will require state regulatory approvals from Wisconsin and Iowa agencies as well as federal approvals from the U.S. Fish and Wildlife Service and the Army Corps of Engineers. The utilities anticipate filing applications with state regulatory agencies in 2018 and 2019. Based on the regulatory process and involvement of multiple local, state and federal regulatory agencies, the companies are anticipating that the project would be in service in 2023.

### **About ATC**

*American Transmission Co. is a Wisconsin-based company that owns and operates the electric transmission system in portions of the Upper Midwest. Formed in 2001 as the nation's first multi-state transmission-only utility, ATC has invested \$3.8 billion to improve the adequacy and reliability of its infrastructure. ATC now is a \$4 billion company with 9,540 miles of transmission lines and 545 substations. The company is a member of the MISO regional transmission organization, and provides nondiscriminatory service to all customers, supporting effective competition in energy markets without favoring any market participant. For more information, visit [www.atcllc.com](http://www.atcllc.com).*

### **About ITC Midwest**

*ITC Midwest LLC is a wholly-owned subsidiary of ITC Holdings Corp., the nation's largest independent electricity transmission company. Through its regulated subsidiaries, ITC owns and operates high-voltage transmission lines in seven states, serving a combined peak load exceeding 26,000 megawatts along 15,000 circuit miles of transmission line. ITC Midwest operates more than 6,600 circuit miles of transmission lines in Iowa, Minnesota, Illinois and Missouri, and holds utility status in Wisconsin. ITC Midwest maintains regional offices in Cedar Rapids, Dubuque, Iowa City and Perry, Iowa; and Albert Lea and Lakefield, Minnesota. ITC's focus on transmission and grid development drives operational excellence and delivers superior value for customers, communities and other stakeholders. For more information, please visit [www.itctransco.com](http://www.itctransco.com).*

### **About Dairyland Power**

*Dairyland Power Cooperative, with headquarters in La Crosse, Wis., provides wholesale electricity to 25 member distribution cooperatives and 17 municipal utilities. A Touchstone Energy Cooperative, Dairyland's service area encompasses 62 counties in Wisconsin, Minnesota, Iowa, and Illinois. For more information, please visit [www.dairylandpower.com](http://www.dairylandpower.com).*
