PROJECT IN SERVICE:

Hill Valley Substation to Cardinal Substation	Dec. 2023
Hickory Creek Substation to Hill Valley Substation	June 2024

*All dates are approximate and subject to change

PROJECT AT A GLANCE	Areas benefited: Iowa, Wisconsin and the Midwest
	Length of route: Approximately 102 miles
	Voltage: 345,000 volts
	End points: The western end point of the line will be at the Hickory Creek Substation in Dubuque County, Iowa. The eastern end point of the line will be the Cardinal Substation in the town of Middleton, Wisconsin. As part of the project, there also will be a new substation in Montfort, Wisconsin, called the Hill Valley Substation.
